

Press release “GT inks”

Emmerich, 04th March 2015

Brother® Consumables Receive the Oeko-Tex® Certificate Used for Direct-to-Garment Printing Machines

On 25th February 2015 Brother received the Oeko-Tex® Certificate for the following articles:

Ink-Jet printing for cotton fabrics, pretreatment and printing with 5 colour pigments (CMYKW) for GT-541/GT-782 and GT-3 Series consumables

The results of the inspection, undertaken in accordance with Oeko-Tex® Standard 100, **product class I**, have shown that the above mentioned products meet the human-ecological requirements of the presently established standards for textiles and textile toys for babies and small children up to the age of three.

We are proud about this result which provides further **evidence** to our valued customers of our efforts to protect and respect the environment. Since the introduction of Brother digital garment printer in Europe, this yearly check-up has been successfully rewarded with a new Oeko-Tex® Certificate.

This is an additional **advantage** for using Brother’s direct-to-garment printers in combination with the original Brother inks and pretreatment.

If you have further questions to this important theme, please contact us.
